

## **DEPARTMENT OF DEFENCE - Headquarters Joint Operations Command**

During the period 2004-2005, Ross Human Directions staff were engaged by the Project Office to assist with the development of the Information and Communications Technology elements for the HQJOC facility, the new Defence operational headquarters at Bungendore.

The tasks included contribution to the:

- development of the Operational Concept Document, and Test Concept Document;
- development of the Functional Performance Specification for the Restricted, Secret, Top Secret systems;
- development of the Life Cycle Costing model; and
- development of the Integrated Logistics Plan.
